MOHAMMADFAISAL VHORA

PROFILE

A passionate and dedicated recent graduate with a strong foundation in Linux systems administration and Amazon Web Services (AWS) Cloud services. Eager to contribute technical expertise in Linux-based environments and cloud computing to help organizations optimize their infrastructure and services. Looking for an opportunity to work with a dynamic team to enhance skills and grow professionally.

WORK EXPERIENCE

GRRAS IT SOLUTIONS

DEVOPS ENGINEER TRAINING

08/2024 - CURRENT

- AWS Cloud Training
- Deployed and managed EC2 instances for application hosting.
- Configured S3 for data storage and access management.
- Set up RDS for database management (MySQL, PostgreSQL).
- Configured VPCs, subnets, and security groups.
- Monitored AWS services using CloudWatch for performance and logs.
- Automated resource provisioning with AWS CloudFormation.
- Gained hands-on experience with IAM, Lambda, and Elastic Beanstalk.
- Implemented security best practices in AWS environments.

Career Gap (Medical Leave)

06/2024 - 08/2024

- Took a temporary break from my career due to medical reasons.
- During this time, I focused on recovery and have since fully resumed my professional activities with a renewed sense of commitment and energy.

NEBULA INFRSPACE LLP

SYSTEM & NETWORK ADMIN

01/2024 - 06/2024

- Implemented and maintained network security measures to safeguard against cyber threats and unauthorized access.
- Maintained network infrastructure, including, NVR, NAS devices, switches, and Sophos firewalls, ensuring peak performance and security for a user.
- Conducted routine system backups and disaster recovery testing to minimize downtime and ensure seamless business continuity in the event of a network failure.
- Troubleshoot and resolved technical issues reported by end-users, delivering prompt and efficient solutions to enhance productivity and reduce disruptions.

R.A.S. PVT. LTD.

IT SUPPORT ENGINEER

10/2022 - 01/2024

- Implemented and maintained IT infrastructure, including network systems and servers.
- Managed virtual servers and cloud-based systems for reliable connectivity.
- Coordinated network infrastructure upgrades, incorporating hardware installations and software updates.
- Documented system configurations and changes meticulously, maintaining a reliable reference for troubleshooting.
- Worked with internal support teams, outsourced managed service providers and suppliers for comprehensive end-user setup and support.

SKILLS

- Windows & Linux System Administration
- Sophos Firewall
- NAS Devices
- System and Server Configuration
- NAS Configuration
- Cloud Computing: AWS (EC2, S3, RDS, Lambda, VPC, CloudWatch)
- Virtualization: VMware, Hyper-V (Basic)
